Fenestration Solutions

Innovating To Deliver Positive Outcomes

Designed and manufactured in North Charleston, SC

Fenestration Design & Innovation

Transforming Multifamily Construction

Our Patented Products Make Your Job Easier.

Our 27 patented products were designed to improve fenestration solutions. We help you meet codes, reduce labor costs, and finish projects faster, so you can deliver exceptional results every time.

Meet Budgets

Pass Water Tests

Reduce Call-Backs

Ensure Satisfaction

Efficiency

Save time and reduce labor costs with our patented products. Pre-installed super shims and super wick facilitate proper installations and moisture management. Our blind attachment systems eliminate field measurements and drywall fastening.

Reliability

Engineered for tough conditions, our impact-rated windows and doors provide unmatched safety and durability. Advanced water management features enable successful on-site water tests and long-term performance.

Builder-Focused Design

Designed for builders, our integrated systems allow single sourcing for windows, doors, and blinds. This guarantees the best pricing and simplifies procurement, enhancing productivity and project outcomes.

Windows Engineered for Performance

Innovative Features for Efficiency & Consistent Results

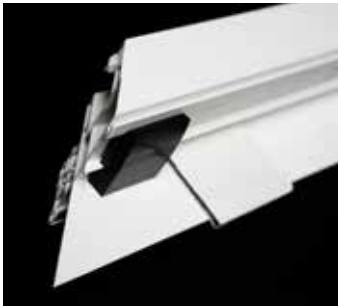

Water Management & Field Water Testing

Pass On-site Water Testing

Our patented designs, including super wick, super shim, & drip cap/pan for mulled windows, provide proper water management, contributing to successful on-site water tests & favorable outcomes.

Similar technology is used to create a continuous nail fin between windows and transoms.

Super wick and super shim system at the sill for water management

Patent-pending top wick and weep system for effective water management at the top of the window

1900 Series frame with drip cap for enhanced water management

2100 Series with sill flashing pan

2100 Series with flashing kit and J channel for superior water management

Windows Engineered for Performance

Innovative Features for Efficiency & Consistent Results

Impact-Rated Windows For Peace of Mind

Future-Proof Your Buildings

Our impact-rated windows offer improved safety, durability, noise reduction, and energy efficiency. They also offer peace of mind for occupants and property owners.

We provide window and door solutions that ensure peace of mind for you now and future owners later.

Impact-rated sash with integral sash lock for added security.

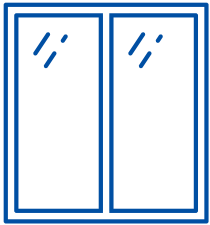

Integral aluminum frame reinforcement on impact-rated sash for increased strength and higher performance ratings.

Windows Engineered for Performance

Innovative Features for Efficiency & Consistent Results

Seamless Window Connections

Streamline Your Design

Our mulling system, with no clips needed to anchor to the framing, provides a seamless window connection, enhancing the aesthetics and integration of multiple window units.

The 2100 Series features a removable connector cap

Energy Efficiency

Our windows meet the 2023 Energy Star Guidelines, offering better thermals and helping reduce energy costs.

Windows Engineered for Performance

Innovative Features for Efficiency & Consistent Results

Blind Attachment Built Into Window Frame

Integral Blinds Simplified

Our blind attachment system integrates directly into the window frame, eliminating the need for field measuring and drywall fastening, simplifying the order and installation process.

2100 Series frame with integral screws and snap-in blind bracket for easy blind installation.

Innovative blind clip for easy blind installation and removal.

Snap-in blind bracket with integral attachment screws for quick installation.

Blinds can be snapped out for easy painting and maintenance.

H Doors Designed for Durability

FENESTRATION

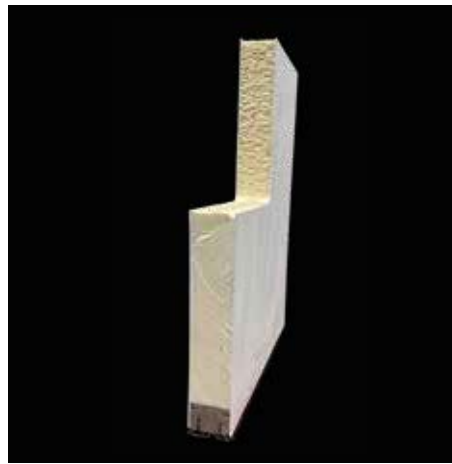

Faster Installation & Reliable Performance

Robust & Reliable Construction

Depend On Our Doors

Our doors are built with robust wood and fiberglass, delivering strength, reliability, and long-term performance.

Reinforced 10-inch bottom rail for superior strength and durability (on the left) versus typical foam core bottom rail (on the right).

Impact-Rated

Our impact-rated doors prioritize safety, security, and durability. They also contribute to noise reduction and energy efficiency, enhancing the value of any building.

H Blinds Built for Convenience

FENESTRATION Thoughtful Design & Hassle-free Setup

Traditional & Between-the-Glass Blinds on Patio Doors

We offer blinds for both traditional mounting and between-the-glass applications, offering flexibility and style. Our between-the-glass blinds reduce maintenance costs and labor.

Protection from Construction Dust

Blinds arrive shrink-wrapped, allowing them to be snapped in place while still protected from construction dust and paint. Once construction is complete, simply remove the shrink wrap and the blinds are ready to use.

Reclaimed Glass, Renewed Purpose

Stunning Surfaces from Recycled Materials

Partnering with Fisher Recycling and GlassEco Surfaces

We are committed to sustainability. Our partnership with Fisher Recycling & GlassEco Surfaces transforms glass waste into 100% recycled glass countertops.

Creative Recycling

Glass waste from our manufacturing is sent to Fisher Recycling and transformed into eco-friendly products by GlassEco Surfaces. This partnership reduces the demand for raw materials and promotes sustainability.

Stylish & Sustainable Design

GlassEco Surfaces crafts beautiful custom countertops and other hard surfaces from 100% recycled glass, offering stylish, sustainable options.

Environmental Responsibility

By recycling our glass waste, we reduce landfill contributions and our carbon footprint, ensuring a cleaner, greener future.
